Heat Indices Climb Starting Monday

Forecast Max Heat Index Values

Weather Forecast Office
Norman, OK
Issued Jun 18, 2023 2:18 AM CDT

Triple digit heat indices will likely start on Monday, especially across portions of southern Oklahoma and western north Texas.

Isolated Severe Storms Possible Today

Weather Forecast Office
Fort Worth, TX
Issued June 18, 2023 1:57 AM CDT

What To Expect:

This morning: A few strong to severe storms are possible mainly across the northeast.

This afternoon: Isolated strong to severe storms possible across portions of Central & East TX.

Threats:

Stay aware and have multiple ways to receive warnings!

NWSFortWorth

Isolated strong or severe storms are possible again today. This morning: areas across the north/northeast will have the best potential. This afternoon: the storms chances shift to Central and East TX. The main threats would be large hail and damaging wind gusts.

Hazardous Weather

There is a risk for more severe thunderstorms this morning over Northeast Texas, Southeast Oklahoma, Southwest Arkansas, and North Louisiana, and again late this afternoon through this evening for portions of Deep East Texas and North Louisiana. Damaging winds and large hail will be the primary threats.

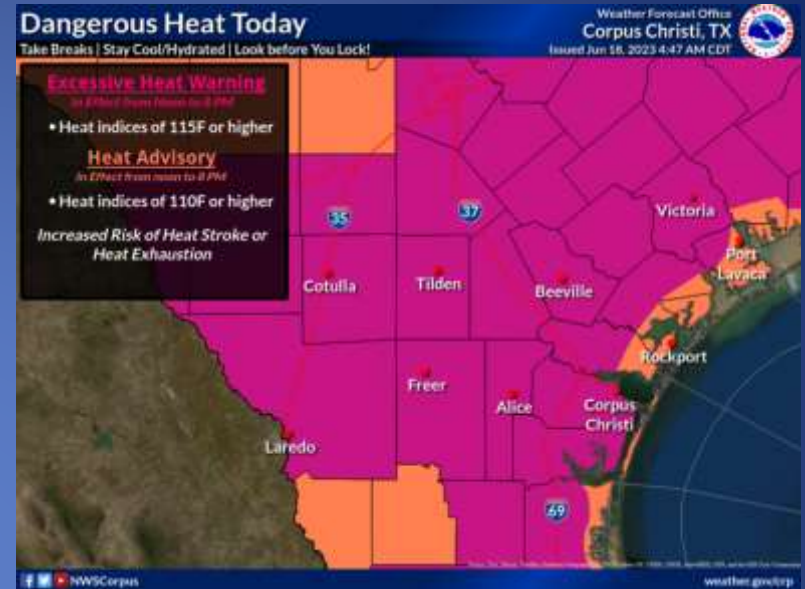

Dangerous heat is expected today. The combination of hot conditions and high humidity will lead to heat index values (feel-like temperature) at or above 113F. Excessive Heat Warnings and Heat Advisories are in effect through Monday evening. Keep practicing heat safety whenever you are.

Hazardous Weather

The heatwave continues today with highs ranging from the upper 90s in a few Hill Country and US highway 77 locations to around 108 along the Rio Grande and Winter Garden areas. Heat Index values will peak at between 105-120 degrees. Isolated strong to severe storms are possible over portions of the Hill Country to the I-35 corridor. The main threat would be large hail with damaging wind gusts and locally heavy rainfall also possible.

An Excessive Heat Warning and Heat Advisory will be in effect across South Texas this afternoon into the evening. Residents are strongly urged to drink plenty of fluids, stay in an air- conditioned room, stay out of the sun, and check up on relatives and neighbors. Young children and pets should never be left unattended in vehicles under any circumstances.

Hazardous Weather

Heat Index values between 111 and 120 degrees will be possible this afternoon. This will be a dangerous situation. If spending time outside, drink plenty of water, wear light weight and light colored clothing, and take frequent breaks from the heat. Young children and pets should never be left unattended in vehicles.

A Rangeland Fire Danger Statement will be in effect for Eddy County and the Guadalupe and Delaware Mountains from this afternoon and into the early evening for elevated fire weather conditions. Obey local burn bans and take caution when doing any activities that use an open flame or sparks.
